Dear Sir,

APPLICATION FOR EDUCATIONAL SCHOLARSHIP

I am eighteen years old and the first of five children of my parents. My parents are no longer together and my father is a petty trader in my village and I used to live with my grandmother.

All through my education, from primary school through senior high school, my aunt has been the one taking care of me. This is because my mother has been away and I have not heard from her and my father is unable to take care of me and all my siblings since his trade does not make him enough money.

When our WASSCE results were released, I applied to this university and I was offered admission to pursue Bachelor of Business Administration. After getting the admission, I came to my aunt to plead with her to assist me through my tertiary education. It was then I discovered that my aunt has more financial responsibilities which I didn't anticipate. She takes care of her three children. They are in schools where she pays a fortune for their education. In addition, she is also doing her further studies in the same university-Lakeside University College. This means that she could not add my university education to her financial responsibilities.

In view of this, I write to the university seeking for scholarship to enable me pursue my university education. I am a serious and focused person. I have the dream of developing myself through education so that I can be of good use to my siblings, helping them to also climb the educational ladder easily and also to be useful to my society.

If I get this scholarship, it will really allow me to study in this noble university. It will also relieve my aunt of the financial burden she is already struggling with. This scholarship will go a long way to creating a better future for a Ghanaian youth. I have a dream of creating businesses with the skills I will acquire from studying in this noble institution. This will enable me to employ other youths in order to reduce unemployment. This dream can only be fulfilled when I am offered this scholarship. I plead that you consider the impossibilities of my life situations and offer me this grand scholarship to study in your prestigious university.

Hoping to receiving a favorable response from you. Thank you.

Yours faithfully,

Sackiterh Christopher Nartey
