WHY I SHOULD BE CONSIDERED FOR THIS SCHOLARSHIP

Winston Churchill once said "success consist of going from failure to failure without loss of enthusiasm". And while I never define my 'failure', I mark my success by my repeated perseverance through adversity.

I was not born a gifted student. Testing and assignment were always difficult for me whether I studied or not, but through determination and hardworking I did always last in either the last of distinction or in the top three of the average students.

One of the most lacking development in Ghana is technology, there is the knowledge of technology but there's no knowledge of application of knowledge, and I as a former member of the computer club, my love for knowledge technology grew everyday, before long, I realized it would be a perfect career for a person such as me.

I am vibrant and outspoken, my drive for knowledge sets me above the rest, I am competent and creative but can also be disciplined and professional when the situation calls for it. I am have a creative mind that sees things in a different perspective but can also see the situation for what it really is, I am not afraid to accept mistakes and learn from them, which has always been one of the greatest for me.

Due to all these qualities, I was a proactive member of various clubs in including the computer club, debate club and the Ghana Red cross members of our school.

Why do I deserve this scholarship? Because I believe with all this determined qualities and little experienced will aid to boost a little or an improvised knowledge of technology in Ghana through Lakeside university.

I am grateful to be considered for this scholarship opportunity, should I be considered selected, I will use this chance to advance the technology of Ghana.
