Dear sir,

APPLICATION FOR SCHOLARSHIP

My name is Abubakari Hamza and I have completed Tamale Senior High School. My plan B to further up with a degree program after I have graduated. I'm high school, I did applied science (technical) and came out with flying colors. I work with ~~are~~ private individual in the construction industry, during my senior high school days. I have learnt and have some experience, the discour~~for~~ process from the ground up, I have discovered the significance, in the engineering field.

My education has been focused on this mindset, the goal is to have a comprehensive view on how to create and build up the environment. With this little experience that I have, it have helped me to speed up my research and education.

My goal is to become a professional engineer to be able to create accessible, affordable, and employable opportunities in underprivileged communities.

I like to study new things, being knowledgeable about my field and I'm always proactive about seeking new opportunities to develop and grow in my role. Those opportunities could be in the form of training, conference, listen to a speaker or taking on a new project, but the motivation is to increase my ^{knowledge} know of the field.

I appreciate your consideration.

With your help I can continue my schooling in the engineering field to bring accessible opportunities to those in need

Sincerely

Abubakar Hamza.
